DYNO NOBEL NOTES INCITEC PIVOT ANNOUNCEMENT

The Board of Dyno Nobel Limited (ASX:DXL) today noted Incitec Pivot's ASX announcement that it had acquired a 13 per cent holding in Dyno Nobel.

The company confirms there has been no proposal received relating to any form of takeover.

Should Dyno Nobel receive a proposal from Incitec Pivot, the Board will review the proposal as well as all other options to maximise value for Dyno Nobel shareholders.

In the meantime, the Board advises shareholders to take no action at this stage.

Dyno Nobel has appointed Credit Suisse and Macquarie Bank as joint advisers.

Background

Dyno Nobel

Dyno Nobel (ASX – DXL) is a leading supplier of industrial explosives and blasting services to the mining, quarrying, seismic and construction industries. Dyno Nobel is the market leader in North America - the largest explosives market in the world - and the second largest supplier in Australia - the third largest explosives market in the world. Dyno Nobel traces its roots back to Alfred Nobel, the inventor of the detonator and dynamite, and since the 1920s has focused on the commercial development of industrial explosives.

Dyno Nobel employs more than 3,300 people and has 36 manufacturing facilities in Australia, Canada, the US, Mexico, Papua New Guinea and Indonesia. Dyno Nobel is currently listed in the ASX S&P 200 and is renowned for its excellent safety performance and as a provider of innovative explosive products and services, which together deliver groundbreaking performance for its customers.

Dyno Nobel receives South African regulatory approval to acquire 50 percent stake in Sasol Dyno Nobel

Dyno Nobel Limited (ASX: DXL) today announced the agreement to acquire a 50 per cent stake in Sasol Dyno Nobel (SDN), a South African initiation systems manufacturer, had been completed.

The US\$34.5 million deal, originally announced in April this year, was subject to approval by the South African Competition Tribunal and its issuance of a merger clearance certificate. The merger clearance certificate was issued on 5 September following a thorough review of explosives initiation systems supply to the South African mining markets.

Dyno Nobel Limited Chief Executive Officer, Mr Peter Richards said, "The stake in SDN is aligned to the Company's strategy of leveraging our core technologies. This will provide direct access to the attractive southern African market that is undergoing a conversion away from the older cap and safety fuse products to non-electric initiation systems.

"These large conversions are taking place as a result of increased focus on safety and enhanced blasting outcomes. Non-electric initiation systems are safer, have lower misfire rates, are more reliable than cap and fuse assemblies and provide improved productivity. With its proven initiation systems, and in partnership with Sasol Nitro, the explosives division of Sasol Industries, SDN is in an excellent position to leverage growth opportunities in the region."

Commenting on the South African resource market, Mr Richards said, "This region is one of the world's great mining regions which continues to see major investment in new mines and improved mining practices which have directly resulted in increased demand for more technically advanced explosives products."

The acquisition is at a 2007 forecast EBITDA multiple of below 6.5 times (before synergies) and will be EPS accretive in the first 12 months. It will be funded from existing facilities and Sasol Industries will maintain a 50 percent holding in SDN.
